Getting started, Help, and Overview of this www document

Basic setup and use of these pages:

- Your monitor should be set to **1024 by 768** resulution or greater.
- Color depth should be set to thousands

    Note: Both of these settings can be set in the Control Panels, using the Display Control panel and then selecting the settings tab. Use the slider to set display resolution to 1024 by 768.

- These pages are best viewed using **Internet Explorer 4.0** or newer.

    Note: Internet Explorer can be downloaded here, and Adobe Acrobat Reader can be downloaded here.

- HF/S steps presented in the process figures are clickable. Clicking on these process step boxes will navigate to substep activities.

The frame to the left is the basic navigation window. The meanings of the symbols are as follows:

🌀	*Shows a graphic diagram of the phase or stepwise activity. Graphics are opened in a new window.*
↓	*Initiates a download, in Adobe Acrobat format, of the text describing step activities.*
